

## GENERAL INFORMATION

**CONDITION ND™** is a unique, superior water conditioning agent. **CONDITION ND™** contains almost 1 lb. of ammonium sulfate (dry) for every 1 quart of product. **CONDITION ND™** also contains a multi-functional water conditioning agent that renders calcium, magnesium, and iron unavailable to complex with the pesticide. There are also ingredients that allow the droplet to remain in a moist state for a longer period of time, increasing the time available for chemical uptake.

## MIXING INSTRUCTION

Add **CONDITION ND™** first and allow dispersion before adding other ingredients.

## DIRECTIONS

1. Always follow pesticide label for best results.
2. Determine rates, typical rates are 1-4 pts/100 gl. Very "hard" water may require 5 or 6 pts.
3. Add **CONDITION ND™** to tank first and agitate.
4. Add remaining ingredients in order according to the pesticide manufacturer's label.

**SHAKE WELL BEFORE EACH USE**  
(unless using the whole container)
